RAFTER CARAVANSTORE

RAFTER SIDE

IMPORTANT WICHTIG IMPORTANTE

- (D) Eine Markise ist ein Sonnenschutz, deshalb muss sie bei kräftigem Wind, starkem Regen oder Schnee eingefahren werden! Wenn es regnet die Markise neigen damit das Wasser ablaufen kann und die Spannstange "RAFTER" montieren.
- (GB) Remember that the awning was designed to protect from the sun, and not from rain, wind or snow. In these cases, we recommend that it will be rolled up! In case of moderate rain, incline the awning for the drainage of water and install the special tension RAFTER.
- (F) Un store est conçu pour protéger du soleil et de ce fait il doit être enroulé lors d'intempéries! En cas de pluie incliner le store afin que l'eau puisse s'écouler et monter le spécial tendeur de toile "RAFTER".
- (ES) Acordarse que el toldo ha sido creado para protegerse del sol y no de la lluvia, del viento o de la nieve. En estos casos aconsejamos inclinar el toldo para hacer fluir el agua e instalar el rafter. En caso de lluvia intensa, de viento o de nieve aconsejamos cerrarlo.
- (I) Ricordare che il tendalino è stato concepito per ripararsi dal sole e non dalla pioggia; In questo caso si consiglia di inclinare il tendalino per favorire il deflusso dell'acqua e montare il RAFTER. In caso di forte pioggia, vento o neve si consiglia di chiuderlo.
